

Control Indoor Humidity.

Installing a GeneralAire® Whole House Humidifier can reduce allergy and asthma symptoms, minimize risk of infection, protect valuables (such as furniture, woodwork and musical instruments) *and* save you money.

Breathe Healthier

How The 900 Works:

Your furnace sends warm air through the unit, evaporating water within. Moistened air is then delivered throughout your home via your home's duct system to keep your air healthy.

Maintenance

Maintenance of your new GeneralAire® 900 Elite Series Flow Through Humidifier is minimal. To ensure peak performance and reliable operation, simply change your Vapor Pad® once per year! Go to www.generalfilters.com / support center / video library to view a video demonstrating how to change your Vapor Pad®.

Install A Humidifier In Your Home To:

Protect Your Family's Health:

Low humidity is where viruses can thrive and cause your throat and nasal passages to dry. This leads to nose bleeds, increased risk of infection, colds, flu and other respiratory ailments. Dry air can trigger asthma and allergy symptoms. Air that's too dry causes dry, itchy, cracked skin.

Protect Your Valuables:

Dry air in your home can cause expensive artwork, wood flooring, cabinets, furniture and musical instruments to crack. Dry air increases annoying static shocks that can damage electronics.

Save Money:

Since dry air can cause woodwork to crack, resulting gaps in windows & doors let cold outside air in. In addition, dry air feels colder. Take the chill out with a 900. Turn your thermostat down and save money.

Why A Whole-House Unit?

- Treats Your Whole House 24 / 7 / 365
- Requires Minimal Maintenance
- Out of Site
- Quiet

Designed & Assembled
in Michigan, USA

Quiet Operation

- You'll forget it's there!

Cover Release Tabs

- To remove cover: gently release tab at bottom of unit, pull cover away and lift off top tab. To replace cover: Hang first on top tab, hear bottom tab "click" in place when fully engaged.

Water Drain Tube

- Water automatically drains from your humidifier.

Damper Control

- Open during use.

Easy-Access Lift-Off Cover

- For simple Vapor Pad® replacement and maintenance.
- Constructed with an ultra-violet stable automotive-grade plastic for long-lasting durability.
- Easy to clean.
- Easy to remove. No tools needed.

Bypass Duct

- Can be mounted to the left or right.

Water Intake Valve

- Water is automatically distributed throughout the Vapor Pad®.

Included With M Models
MHX3 Manual Humidistat

Your new 900M comes with an easy-to-use MXH3 humidistat. Simply turn the dial to the left for more humidity, and to the right for less.

Included With D Models
GFX3 Automatic Humidistat

Your new 900D comes with an easy-to-use GFX3 humidistat that automatically changes the setting with the changing outdoor temperatures to maintain your desired humidity level.

Winter Settings

During winter months, be sure the water supply is turned on, your damper control is set to "Open" or "Winter", and your humidistat is set somewhere between 40% and 60%.

How Much Humidity Do I Need?

Ideally, your home's humidity levels should stay between 40% and 60%. Outside that range, your risk of being adversely affected increases.

Replacement Vapor Pad®

- GF GA19

For optimal performance, replace your Vapor® Pad at the start of each heating season, and again mid-season.
